MESSAGE FROM THE DIRECTOR

Mounting allegations of corruption, violations of well-established ethical norms and the weakening of accountability mechanisms in the U.S. and many other parts of the world underscore the critical need for legal professionals knowledgeable about anti-corruption laws, cases, codes of conduct, compliance training, and risk management tools.

The U.S. and International Anti-Corruption Law Summer Program provides this information in small classroom settings, with leading practitioners sharing first-hand experience and fostering deeper understanding.

As former president & CEO of Transparency International-USA and as a citizen concerned about integrity in the public and private sectors, I can attest to the tremendous value of this program. Whether you are -- or are currently seeking to be -- a government official responsible for accountability, a compliance lawyer advising companies operating in foreign markets, a development practitioner, contractor, NGO or academic, you will benefit from the in-depth expert training.
