No. CR 18-913

STATE OF LONE STAR * IN THE DISTRICT COURT v. * IN AND FOR * BREE CANDY TREVINO * TRAVIS COUNTY LONE STAR

Prepared by:

Hon. Karen S. Townsend and ASUA Gloria Bedwell 4th Judicial District Judge/ U.S. Attorney's Office Missoula, Montana/Mobile, Alabama

Copyright 2018 Texas Young Lawyers Association And Karen S. Townsend and Gloria Bedwell All Rights Reserved

This case file was commissioned by the Texas Young Lawyers Association and was prepared by the Honorable Karen S. Townsend and ASUA Gloria Bedwell for the 2019 National Trial Competition

Statement of the Case

This is a criminal action against Bree Candy Trevino. The state's allegation is that on or about April 30, 2018, Bree Candy Trevino negligently caused the death of two individuals, TP, her boyfriend, and PP his 3-year old daughter, while operating a motor vehicle while under the influence of alcohol and drugs. Ms. Trevino has pled not guilty to the charges.

Witnesses will include:

- 1. Dusty Stockard: Highway Patrol Trooper who investigated the crash scene.
- 2. S. Phillips: Director, Lone Star State Crime Lab.
- 3. Bree Trevino: Defendant who will testify on her own behalf.
- 4. Dr. C. Pozza: Defense toxicologist.

Witness and Exhibit List

Witnesses:

- 1. Dusty Stockard (may be either male or female)
- 2. S. Phillips (may be either male or female)
- 3. Bree Trevino (must be female)
- 4. Dr. Pozza (may be either male or female)

Exhibits:

- 1. Trooper Stockard's diagram from crash scene
- 2. Photo of Twisted Tea can found at crash scene
- 3. Photo of Twisted Tea carton found at crash scene
- 4. Photo of Twisted Tea bottle found Acura
- 5. Photo of Acura at crash scene
- 6. Photo of Acura's sunroof damage with hair strands
- 7. Photo of grab handle in interior of Acura
- 8. Photo of baggie of marijuana recovered from Acura
- 9. Honda Recall Notice
- 10. A-E: text messages from Bree Trevino's cell phone recovered from Acuara
- 11. Coroner's Report
- 12. Lone Star Crime Lab Report
- 13. Lab Report from Hospital blood test of Bree Trevino
- 14. Lone Star Crime Lab DNA Report
- 15. Implied Consent Advisory

STIPULATIONS AS TO EVIDENTIARY MATTERS

Procedural Matters

- 1. Federal Rules of Criminal Procedure and Federal Rules of Evidence apply.
- 2. All witnesses called to testify have identified the parties, other individuals, or tangible evidence in depositions or prior testimony and will, if asked, identify the same at trial.
- 3. Each witness who gives a deposition agreed under oath at the outset of his or her deposition to give a full and complete description of all material events that occurred and to correct the deposition for inaccuracies and completeness before signing the deposition.
- 4. All depositions were signed under oath.
- 5. For this competition, no team is permitted to attempt to impeach a witness by arguing to the jury that a signature appearing on a deposition does not comport with signatures or initials located on an exhibit.
- 6. Other than what is supplied in the problem itself, there is nothing exceptional or unusual about the background information of any of the witnesses that would bolster or detract from their credibility.
- 7. This competition does not permit a listed witness, while testifying, to "invent" an individual not mentioned in this problem and have testimony or evidence offered to the court or jury from that "invented" individual.
- "Beyond the record" shall not be entertained as an objection. Rather, teams shall use cross-examination as to inferences from material facts pursuant to National Rule 7.4I, (D), I, and (F) and 8.5. Any party wishing to file a complaint concerning a violation of this rule shall use the procedure found in Rule 8.3.
- 9. The State and the Defendant must call the two witnesses listed as that party's witnesses on the witness list.

- 10. All exhibits in the file are authentic. In addition, each exhibit contained in the file is the original of that document unless otherwise noted on the exhibit or as established by the evidence.
- 11. It is stipulated that no one shall attempt to contact the problem drafters about the problem before the conclusion of the 2019 National Trial Competition Final Round. Contact with the competition officials concerning this problem must be pursuant to the rules of the competition.
- 12. 2019 is the year in which this case comes to trial.
- 13. Presentation and argument on pretrial motions shall be limited to a total time of sixteen minutes divided equally between the parties as follows: (1) the State shall have four minutes to present any pretrial motions; (2) the defendant shall have four minutes to respond to the State's motion(s); (3) the defendant shall have four minutes to present any pretrial motions; and (4) the State shall have four minutes to respond to the respond to the defendant's motion(s).
- 14. The competition permits teams to argue additional case law and other relevant authority to support the team's argument on motions and evidentiary issues. However, <u>no additions or deletions are permitted to the provided jury instructions or to the jury verdict form.</u>

Substantive matters

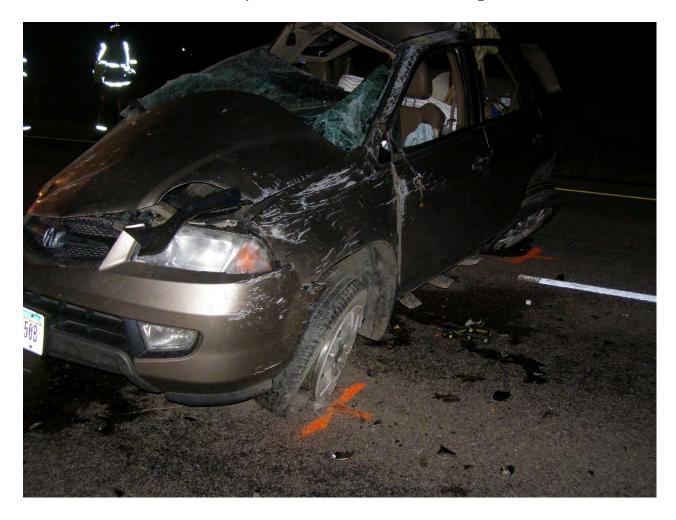

- Prior to trial, the Defendant filed a motion to suppress the results of the blood test taken pursuant to the Implied Consent statute asserting that Ms. Trevino's consent to the test was involuntary. The Court has denied that motion.
- Prior to trial, the Defendant sought to exclude the results of blood test results taken at the hospital arguing that HIPAA barred release of those results. The Court denied that motion since the hospital results were obtained through Court Order.
- 3. Prior to trial, the Defendant sought to exclude the evidence recovered from the Acura including the baggie of marijuana and the Twisted Tea bottle. The Court denied that motion since the evidence was recovered pursuant to a search warrant based on probable cause.
- 4. Prior to trial, the Defendant sought to exclude the text messages and cell tower information recovered from the Defendant's cell phone and Tim Parker's cell phone. The Court denied that motion since the cell phones were searched pursuant to a search warrant based on probable cause.

ARMADILLO DAILY BULLETIN

May 1, 2018

TRAGEDY ON THE INTERSTATE

Kathleen Flynn Peterson, Courts Reporter

Shortly after 4:00 AM on April 30, 2018, tragedy struck on Interstate 10. An Acura MDX heading for Armadillo from the Armadillo State Park, drifted off the passing lane into the median, overcorrected and as the Acura made contact with the pavement, the Acura rolled three or four times. All three occupants of the Acura were ejected. Two died. A deceased male and his three-year old daughter were discovered by first responders some distance from the Acura, dead at the scene. None had been wearing seatbelts, and the child was not restrained in a car seat. Names have not been released until their families can be notified. 9-1-1 received the first reports of a single vehicle crash at 4:17 AM. Armadillo County Sheriff's deputies, ambulance personnel, and Lone Star Highway Patrol responded to the scene. Trooper Dusty Stockard took charge of the investigation. Stockard arrived on scene at 5:43 AM after being wakened. Because Stockard is a certified crash investigator, Stockard was assigned primary responsibility for investigating the accident.

The suspected female driver had been taken to Lone Star Community Hospital by the time Trooper Stockard arrived at the crash scene. The hospital reports she is in serious condition, but expected to survive. The dead child had also been removed by ambulance.

Trooper Stockard made a brief trip to the hospital to attempt to get a blood sample from the driver. Stockard then returned to the crash scene to complete his investigation. Stockard examined the deceased male and determined because of his size he could not have fit in the driver's seat at the time of the crash.

Trooper Stockard discovered where the Acura left the highway and entered the median, travelled for over 200 feet before heading back to the pavement. When it hit the pavement, it rolled two or three times, travelled 29 feet in the air, and then slid over 200 feet before coming to rest. Apparently, the driver was ejected through the sunroof of the Acura, the male through the rear door, and the child through the side window. Stockard said based on preliminary data that the Acura was travelling 70 miles per hour when it entered the median. That speed is below the posted speed limit on the Interstate.

This reporter learned from law enforcement sources that the deceased male and surviving female had visited the Qwik Stop bar around midnight on April 29th-30th and met with one of the bouncers and smoked marijuana with that bouncer. Follow up interviews with this bouncer are expected.

District Attorney Gary Winters advised this reporter that a Grand Jury will be impaneled to consider criminal charges once the investigation is complete. He advised that blood analysis results from the driver are pending.

1 2 3	IN THE FOURTH JUDICIAL DISTRICT COURT FOR THE COUNTY OF ARMADILLO STATE OF LONESTAR		
4 5 6 7 8	STATE OF LONESTAR, v. BREE CANDY TREVINO.		CRIM. NO. 18-DC-70 DEPOSITION OF DUSTY STOCKARD June 20, 2018
9 10 11 12 13 14 15 16 17 18 19 20 21	crim atten	e Star High School. I graduated from inal justice. I joined the Lone Star F aded the 16-week Highway Patrol Ac	Highway Patrol.
22 23 24 25 26	Q:	and have been here in Armadillo nov Have you had any specialized train viduals who were operating motor ve	ning in investigating automobile crashes or

1	A:	Well, in addition to the basic training at the academy in DUI investigations, I	
2	am c	ertified as a DRE expert, and accredited in crash investigation. I have	
3	investigated approximately 1000 potential DUI's over my career, and made 400		
4			
5	arres	ts for DUI, have investigated approximately 1200 crashes, including 16 prior	
6 7	fatal	crashes, and of those, 12 involved impaired drivers and 11 of those were 1	
8	vehic	cle only crashes in my 11-years and 8 months experience with the Patrol.	
9	Q:	So, are you familiar in recognizing the signs of an impaired driver?	
10	A:	Absolutely.	
11	Q:	You said DRE, what does that mean?	
12 13	A:	That's an acronym for Drug Recognition Expert.	
14	А.	That's an acronym for Drug Recognition Expert.	
15	Q:	You indicate that you are certified as a DRE expert. What kind of training do	
16	you l	nave to undertake to get that certification?	
17	A:	There is both course work and actual on the job case work with instructors.	
18	The	course work is 2-weeks long I took it at Ft. Humphrey in Austin. I had to	
19	beco	me familiar with all of the classes of drugs and their effects on the body and	
20			
21	pass	a proficiency test. Then, when I was recommended for the field work, I went	
22	to M	aricopa County in Arizona and trained with the instructors. The training was at	
23	the N	Aaricopa County Jail. Various inmates who were first being processed into the	
24			
25	jail v	vere asked to volunteer for our training and we evaluated them and rendered	
26	opini	ions as to whether or not they were on a particular drug and then a UA was	

1

used as confirmation. We conducted the evaluations under the instructor's supervision and had our findings critiqued. You needed an 80% proficiency rating to be certified. I actually obtained a 98% proficiency rating, the highest in my class. I now serve as an instructor in the DRE program.

Q: How exactly did you get accredited as a crash investigator?

Well, we have initial training at the academy that all Troopers take. That A: portion is known as learning how to document a crash. One of the Patrol's primary responsibilities is to investigate crashes on our state highways. The Patrol offers additional training to troopers who wish to develop some expertise in crash investigations. There are three levels of additional training. The first is entitled "At Scene" where we learn what to look for at the scene of a crash. So, we learn about and learn to identify yaw marks and drag marks, etc. This training is a two-week course that consists of class work and simulations. The third level is known as the Technical Level. Here you incorporate physics and mathematics in your analysis. You must have 3-years of experience on the force before being eligible for this training. Finally, the last level of accreditation is known as the Reconstruction Level where you are trained to reconstruct accidents using the tools you have learned previously. There is a national organization that accredits accident investigators. It is known as the Accreditation Commission for Traffic Accident Reconstruction. They administer an 8-hour exam and if you pass, you get

1	accre	edited. Although I did not pass on my first try, being unable to complete the	
2	second portion within the 4-hour time limit, I tried again and passed and now am		
3 4	one	of a few in the State with this accreditation.	
5	Q:	Have you been recognized as an expert in the areas of drug recognition, and	
6	crash	investigation in this state before?	
7 8	A:	Yes, many times.	
8 9	Q:	Were you called to investigate the crash that took place on Interstate 10 in the	
10	early	morning hours of April 30, 2018?	
11	A:	I was.	
12 13	Q:	How were you notified?	
14	A:	By dispatch.	
15	Q:	What were you told?	
16 17	A:	That there had been a two-fatality crash on the Interstate and they needed a	
18	crast	n investigator.	
19	Q:	What time did you get the call?	
20 21	Q. A:	I was notified by dispatch at 4:43 AM. I was at home asleep.	
22		What did you then do?	
23	Q:	-	
24	A:	Well, I got up, dressed in my uniform, got my gear and headed for the crash	
25	site.	I arrived at 5:34 AM.	
26	Q:	When you got there, what was the first thing you did?	

A: Well, I obviously took a look at the scene. Previous responders had managed to block traffic to attempt to preserve the scene as much as possible. I saw an ambulance, Armadillo County sheriff's deputies, EMT's and other first responders and a gold, Acura MDX that had crash damage. There was a semi-tractor parked up ahead. Another Lone Star Trooper, Joe Alexander, briefed me. He advised that a young female, approximately 3-years old, was deceased and had been already taken from the scene, that a deceased male was still at the scene, and that the driver of the Acura MDX had been taken to the hospital. I went and took a quick look at the deceased male. Alexander told me that the female who had survived had denied driving, although a deputy on the scene, Richard Zielinski, told me that she had admitted driving. Both Alexander and Zielinski advised me that it appeared that she was under the influence of alcohol or drugs. She appeared to be slurring her words and smelled of alcohol.

Q: So, what did you do next?

A: Well, I thought it would be important to attempt to obtain a blood sample from the surviving woman as soon as possible as we were already over an hour and one-half after the crash, and left Trooper Alexander and Deputy Zielinski in charge to preserve the scene, and headed to Lone Star Community Hospital to see if I could obtain consent for a blood draw under our implied consent statutes.

Q: How long did it take to get to the hospital.

1	A:	About 10 minutes.	
2	Q:	Did you locate the suspected driver?	
3 4	A:	I did, she was in the emergency room.	
5	Q:	What was her condition?	
6	A:	Well she was in pretty bad shape, in no condition to be taken to detention, but	
7		esponded to my questions.	
8			
9	Q:	So, you spoke with her?	
10	A:	I did.	
11 12	Q:	Did you ask her how she had come to be in the crash?	
13	A:	I did. She said that she and her boyfriend, Tim, had been at the State Park and	
14	had been kicked out for being too loud. They had loaded up the Acura. That his		
15	daughter, Pippa, was asleep, so they decided to fold the rear seats down, put the		
16			
17	foam mattress over the seats and let Pippa lie down. Tim was pretty drunk. Then		
18	they	headed back to town.	
19 20	Q:	Did you detect any alcohol on her breath.	
21	A:	I did.	
22	Q:	How would you describe her demeanor?	
23			
24	A:	Well, she was a bit defiant, and did not show significant concern about the	
25	cond	ition of her passengers.	
26	Q:	What did you do next?	

1	A:	I retrieved a copy of the Implied Consent Advisory Form and read the	
2	comp	blete form to her except for the portion about commercial driver's licenses. I	
3	then asked her if she would consent to a blood draw, and she said yes.		
4 5	Q:	I'm handing you what has been marked as the Government's Exhibit 1, can	
6	-		
7	you 1	dentify this?	
8	A:	Yes, I can.	
9	Q:	What is it?	
10	A:	That is the Implied Consent Advisory Form I used in this case.	
11 12	Q:	Is this a true and accurate copy of the Implied Consent Advisory Form?	
13	A:	It is.	
14	Q:	What time did you read her this form?	
15			
16	A:	The form says 6:43 AM.	
17	Q:	So then what happened?	
18	A:	I watched the hospital tech draw the blood, took the blood sample with me	
19	and r	eturned to the crash site.	
20			
21	Q:	When you spoke with Ms. Trevino at the hospital, were you able to estimate	
22	her h	eight.	
23	A:	Yes, although she was lying in a hospital bed, I estimated her to be	
24			
25	appro	oximately 5' 2" tall. That is consistent with the information on her driver's	
26	licens	se.	

1	Q:	What happened after you got back to the crash site?
2	A:	I looked for debris from the crash, examined the Acura, spoke to other
3 4	respo	onders at the scene about what they had seen upon arrival.
5	Q:	Did you learn what time the crash had occurred?
6	A:	The first calls to dispatch came in at 4:17 AM reporting a single vehicle crash
7 8	in the	e west-bound lane near milepost 109. We calculated that the crash had
9	occu	rred somewhere between 4:10 and 4:15 AM.
10	Q:	What else did you learn?
11	A:	There were three occupants in the Acura. All were ejected from the vehicle.
12 13	Two	were killed. The adult male, Tim Parker, was located on the right shoulder, a
14		Feet east of the Acura, surrounded by a large pool of blood. His three-year old
15		hter, Pippa, was also deceased and found on the left side of the left lane a few
16 17		west of the Acura. The third occupant, Bree Trevino, was discovered
18		ming and crying in the roadway, about 40-60 feet east of the Acura. She had
19		red injuries in the crash but was conscious and able to walk and speak.
20		
21	Q:	Was the deceased adult male still at the scene when you got back from the
22 23	hosp	ital?
23 24	A:	Yes
25	Q:	Did you examine his body?
26		

A: I got a rough estimate of his height and weight before the ambulance
transported him. He was over 6-foot tall and I estimated his weight at about 220. I
also noticed a significant bruise on his head.

Q: What else did you note from the scene?

A: Well, the road conditions were dry and clear. The Acura was in upright position with no lights on and the key in the ignition, but there was no power to the vehicle. The sunroof had disappeared during the crash. There was hair in the edge of the broken out sunroof. The driver's seat was close to the steering wheel and I concluded that someone small had been the driver because the adult male was too large to fit in that seat. In the debris field, I saw an empty carton and an empty can of Twisted Tea. Inside the Acura I saw a full bottle of Twisted Tea on the floor in front of the second seating row. The rear seat backs of the Acura had been put down and a mattress rested on top of the seats. There was an unrestrained child seat laying on top of the mattress. I concluded that none of the occupants of the Acura had been wearing seatbelts. I also recovered two cell phones from the Acura. **Q**: Did you reach any conclusions on how the accident had occurred? A: I did. I determined that the Acura went into the median and the driver then over-corrected, causing the vehicle to roll. I concluded that the driver had fallen asleep and allowed the Acura to drift into the median, had been jarred back to attention when the Acura went into the median, had attempted to get back onto the

highway and overcorrected which at the speed that the Acura was driving caused the Acura to roll. The Acura travelled 236.8 feet in the median before it attempted to get back on the highway and began to roll. It was travelling at 70.48 mph in the median. There was no evidence of braking before the Acura began to roll. I estimate that it rolled 3-4 times before coming to rest 217.2 feet from where it hit the highway again and began to roll. It was airborne for 29 feet. **Q**: You said that all three occupants were ejected. Were you able to conclude how and when they were ejected? Yes. I believe that Ms. Trevino was ejected first through the sunroof. I A: believe that Mr. Parker was ejected second through the rear door of the Acura, and then that the child was ejected last through the side window. You indicated that you concluded that someone small, Ms. Trevino, had been Q: the driver based on the location of the driver's seat. Did you make any other observations at the crash scene about whether or not Tim Parker could have been the driver? I did. As I said, he had a significant bruise on his forehead/right side of his A: face that was consistent with grab handle located above the window in the rear of the Acura. I concluded that he had received this bruise when the Acura rolled and he was thrown against the grab handle located in the ceiling. That led me to believe that he was in the back on the mattress at the time of the crash. Also, I

mentioned that we found hair in the edge of the sunroof. The Crime Lab matched the DNA from that hair to Ms. Trevino.

Q: You indicated that when you found the Acura, there was no power to the Acura, and you observed the seat close to the steering wheel. Did you take any specific measurements about the location of the driver's seat? Were photographs taken at the crash scene.

A: No, I eyeballed it, just like I eyeballed the height and weight of Tim Parker and concluded he could not have sat in the driver's seat as found.

Q: Did you attempt to see if the seat could have moved during the time it was rolling over and over?

A: Well, I wasn't there so could not have done that. With no power, the seat could not move.

Q: Did you document the crash scene?

A: Oh yes, we try to document as much as we can from a fatality accident.

Q: And did you prepare any crash scene diagrams?

A: I did.

Q: Handing what has been marked for identification as Government's exhibits 1,2,3,4,5,6, 7 and 8, can you identify these items?

A: Yes, I can. Exhibit 1 is my diagram of the crash scene. The other exhibits are the photos taken at the crash scene that show the Acura, the debris field, the empty carton of Twisted Tea, the bottle of Twisted tea, the grab handle inside the Acura, and the baggie of marijuana recovered from the Acura.

Q: Is your diagram a true and accurate copy of the original and do the photos clearly and accurately depict what they portray?

A: Yes, it is and they do.

Q: You mentioned that you retrieved two cell phones. Did you do any later examination of these items?

A: Yes, I applied for a search warrant to examine the phones. We determined that one of the phones belonged to Ms. Trevino and the other to Mr. Parker. Ms. Trevino's phone contained some text messages sent to a Jake S. moments before the estimated time of the crash. Mr. Parker's phone was examined by one of our local experts and he determined that it continued to "ping" off various cell towers between the Campground and the site of the crash during the time right before the crash.

Q: Were these text messages important to your investigation?

A: Absolutely. The text messages on the phone made reference to smoking marijuana that evening and that they were on their way to meet up with Jake S. to smoke some more marijuana.

Q: What did you do with the blood sample that had been taken from Ms. Trevino at the hospital?

A: Well, I kept it in my possession when I returned to the crash scene, locked it up in my patrol car, and after completing my investigation, I took it straight to the Crime Lab for analysis.

Q: After delivering the blood sample to the Crime Lab, did you do any other investigation of this event?

A: Well, I completed work on my report and the crash scene diagram, I located and interviewed Jake S. and learned that Ms. Trevino had spent time with Jake earlier in the evening and that they had smoked marijuana together and that Jake was expecting her to stop by the Qwik Stop and again smoke some marijuana because of the text messages, but Jake never heard from her after 4:15 AM.

Q: Anything else?

A: No just responding to this deposition and meeting with the prosecutors to prepare the case.

Q: Based on all of your investigation, your analysis of the crash scene, your contact with Ms. Trevino and your review of the crime lab reports, do you have an opinion whether or not she was the driver and was under the influence of alcohol and drugs at the time of the crash?

A: I do. She was definitely the driver and she was under the influence.

1 2 3		FOR THE COUNT	CIAL DISTRICT COURT Y OF ARMADILLO LONESTAR	
4	STA	STATE OF LONESTAR, CRIM. NO. 18-DC-70		
5	DEPOSITION OF S. PHILLIPS v.			
6 7		EE CANDY TREVINO.	July 7, 2018	
8				
9	Q:	Would you state your name please	?	
10	A:	My name is S. Phillips.		
11	Q:	How are you employed?		
12 13				
14	A:	I am the Director of the Lone Star	Division of Forensic Sciences, commonly	
15	known as the State Crime Lab.			
16	Q:	How long have you served as Dire	ctor?	
17	A:	I was named as the Director by the	Attorney General nine months ago.	
18	Q:	Before being named as the Directo	r. what did vou do?	
19		-		
20	A:	I was a forensic toxicologist at the	Lab. I worked in that position for 10	
21	years			
22	Q:	Tell us about the training that you	had to qualify you to be a forensic	
23	toxicologist.			
24 25		0105150.		
25 26				
20				

A: Well, I graduated from the University of Lone Star with a B. S. degree in microbiology. During college, I worked as an intern for the Austin Police
Department Crime Lab in their toxicology section and learned police procedure.
After graduation, my first job was with the Lone Star State Crime Lab and I've been there ever since. I started doing analysis of blood alcohol samples primarily for DUI cases but also for probation cases, later also began doing analysis of blood samples for suspected drugs, both prescription drugs and illegal drugs in driving cases.

Q: After graduating from college and beginning work at the Crime Lab, did you undergo any additional training?

A: I did, quite a bit. Well, I began work on my Master's degree part-time and was awarded that degree in microbiology five years ago. When I first started work at the Crime Lab, I received on-the-job training at the Crime Lab. I was trained in the procedures that are followed there, and then worked with a more experienced toxicologist on samples. Each sample I did, was re-checked by the senior toxicologist to see if I was correct and if I followed proper procedures. Annually, we are evaluated for our proficiency. Our Lab is accredited by the American Board of Forensic Toxicology, so each year out-side peer reviewers come to the Lab to review our work and our procedures. So far, the Lab and I have passed each review. We have followed the recommendations of the Scientific Working Group

on Toxicology to ensure that our procedures and our toxicologists meet the latest requirements. I also attend annually a forensic toxicology conference so that I can be updated on the latest science. Our Lab subscribes to all of the journals in the field and I keep up with the articles. I have been asked to teach some classes at the local university on law enforcement toxicology analysis.

Q: Before we go any further, could you tell us exactly what forensic toxicology is?

A: Well, basically, toxicology is the analysis of unknown samples to determine what is contained within the sample and how much of the unknown is in the sample, in other words the weight of the unknown. When we use the term
"forensic" we simply mean that it is court related. For me in particular, I analyze blood and other bodily fluids.

Q: So how do you go about your job?

A: Well, when I am assigned a case, I complete a sheet of the assignment. I complete the sheet using the referral sheet from the law enforcement agency that has submitted the sample for analysis. That sheet will have a suspect's name, an agency case number, a brief description of what is being submitted, and after it comes in, it is assigned a Lab case number. I enter all of the information into my processing sheet. I then retrieve the sample from our secure storage. In this case,

the sample I retrieved consisted of two blood vials that had been kept in our locked refrigerator.

Q: After you retrieve the sample, then what do you do?

A: I make use of the scientific instruments in the Lab to conduct the analysis.

Q: Please explain.

A: Well, first, I extract a very small portion of the sample (in this case of the blood) and run a screening test on it to see if it tests positive for alcohol or common drugs. We use an immunoassay for this screening, a different immunoassay for each suspected drug. An Immunoassay is simply a chemical solution designed to react to particular substances. If we get a positive result, we then move to do a confirmatory test.

Q: What do you use for a confirmatory test.

A: We use different instruments, each paired with another instrument known as a mass spectrometer or MS. One instrument is known as a high performance liquid chromatography (LC) and the other is a gas chromatograph (GC). Each of those instruments is paired with another instrument known as a mass spectrometer. The LC-MS or the GC-MS not only confirms, but provides quantification. The LC or GC separates the sample into its components while the MS represents a unique "fingerprint" pattern that can be used for identification.

Q: What do you then end up with?

1	A:	You end up with a printed chart from the MS that shows certain peaks on the
2 3	chart	of different heights. Each compound will result in a different peak, and the
3 4	peak	s are calibrated with standards so when we see the chart, we know what was in
5	the s	ample and how much of the particular unknown is in the blood typically
6	repre	esented as nanograms per milliliter of blood.
7 8	Q:	So, in this case, what did you do?
9	A:	I first extracted with a pipette a very small amount of the sample to run the
10	scree	ening tests. In this case, we ran 7 separate screening tests to screen for both
11 12	alcoł	nol and common drugs.
13	Q:	Then what?
14	A:	Well, we got positive results on the screening tests for several substances so
15	we th	nen used the GS-MS for the confirmation tests and quantitative analysis.
16 17	Q:	Did you get results?
18	A:	We did.
19	Q:	Are those results documented in a report?
20 21	A:	They are.
22	Q:	I'm handing you what is identified as Government's Exhibit 12 and ask if
23		
24		can identify that document?
25 26	A:	I can, it is the report I prepared for the analysis conducted in this case.
	Q:	So, what did you find?

A: The screening test showed a positive for THC, the active ingredient in marijuana. When I conducted the quantitative analysis using the GS-MS I found that there were 33 ng/ml of THC-COOH (Marijuana metabolite) in the sample. This metabolite is an inactive form of THC, but does show some prior use of marijuana, but pinning down the exact time frame of that use is difficult to say. Although individuals differ, the literature states that the active ingredients of marijuana generally stay in a person from 3-5 hours. We found .045 of MDMA commonly known as Ecstasy, in the sample. We did not detect any alcohol in the sample.

Q: What kinds of effects does MDMA have on the body?

A: It has hallucinogenic properties which can cause dilated pupils, body tremors, difficulty with speech, poor perception of time and distance, and disorientation.

Q: So, do substances that are ingested into the body metabolize and therefore cannot be detected after passage of time?

A: They do. Alcohol generally lasts from 0-1 day. Marijuana can be detected
14-30 days after use, although the active ingredient dissipates much faster. Ecstasy
lasts 5-7 days.

Q: As part of your evaluation of this case, were you made aware of analysis of Ms. Trevino's blood drawn at the hospital.

[
1	A:	Yes, I was. It is typical in a case when someone is brought to the hospital for	
2 3	treat	ment of injuries received in an automobile crash for the hospital to draw blood	
3 4	and a	analyze that blood for treatment purposes. In this case, that was done.	
5	Q:	What did the hospital results show?	
6	A:	That test showed that she had 0.054 g/100ml of alcohol in her blood.	
7 8	Q:	So did the Lone Star Crime Lab do any other sort of analysis connected with	
9	this c	case?	
10	A:	Yes we did. We did DNA analysis of hairs recovered from the vehicle to see	
11 12	if we could match the recovered hairs with the individuals.		
13	Q:	What hairs were analyzed?	
14	A:	Well, there were some long hairs recovered from the edge of the sunroom,	
15 16	and s	show other hairs recovered from a rear side window	
17	Q:	Handing you what's been marked as Government's Exhibit 14, what is that?	
18	A:	It is the DNA Report completed by the Crime Lab.	
19 20	Q:	Are you a keeper of all of the records at the Crime Lab?	
21	A:	Well, as the Director, I am in charge of everything, so that includes the	
22	recor	ds.	
23	Q:	Was the Crime Lab able to make any matches to the individuals involved in	
24 25	this case?		
26			

1	A: Yes we were. The long hair matched the DNA profile for Bree Candy
2	Trevino. The other hair matched the profile for Pippa Parker.

1	BREE CANDY TREVINO,				
2	the witness, after having previously been duly sworn to tell the truth, the whole truth and				
3	nothing but the truth, was examined and testified as follows:				
4	EXAMINATION				
5	BY MR. WINTERS:				
6 7	Q: All right. Ms. Trevino, before I ask you any questions, I need to advise you of your				
8	rights. You are now appearing before a Lone Star grand jury which is investigating allegations				
9	that you negligently caused the death of one Tim Parker, while were operating a vehicle, in				
10	violation of the law. You are the target of this investigation but the investigation is on ongoing				
11	one and it is possible that you could be named as a defendant in an indictment arising out of this				
12 13	investigation. Do you understand? Did you receive a subpoena to testify before this Grand Jury?				
14	A: Yes.				
15	Q: And, do you recall that there was a letter attached to the subpoena? That letter				
16	explains to you your rights as a grand jury witness. Did you discuss this letter with your lawyers?				
17	A: Yes. They explained to me about my rights.				
18	Q: I will go over these rights with you again to make sure you understand. You have a				
19	right to refuse to answer any question if you believe that the truthful answer to that question might				
20	tend to incriminate you. You may answer some questions and you may refuse to answer other				
21 22	questions which you believe may incriminate you. Do you understand this part of it?				
23	A: Yes.				
24	Q: If you answer any questions, the answers which you give may be used against you				
25	in a court of law or other proceedings. Do you understand?				
26	A: Yes.				
	Page 2				

1	Q:	If you decide to answer questions which are asked of you, you may also the	ereafter			
2	stop answering at any time and invoke your privilege against self-incrimination as I have already					
3	explained to you. Do you understand?					
4	A:	Yes.				
5	Q:	Under the Sixth Amendment, you have the right to consult with an attorne	y of your			
6 7	choice before answering any questions. Further, although an attorney cannot be with you in this					
7 8		om, because its proceedings are secret, your attorney may be present outside				
9	grand jury room and you may request permission to leave the grand jury room, at any time, to					
10	confer with your attorney before answering any questions. Do you understand this?					
11	A:	Yes. One of my lawyers is outside. They did not want me to testify, but I	told			
12			told			
13		d these people to know what happened. They said it was my choice.				
14	Q:	You are under oath, so you have sworn to tell the truth. If you lie to this g	rand			
15	jury, that is, if you make a knowing misstatement of a material fact to the grand jury, you could be					
16	charged with perjury. Do you understand that?					
17	A:	Yes.				
18	Q:	Do you understand each and all of your rights as I have explained them to	you?			
19	A:	Yes.				
20	Q:	Do you have any questions about your rights?				
21	A:	No.				
22 23	Q:	Knowing your rights, to you wish to testify here today?				
23 24	A:	Yes. I want to tell my side.				
25		- -	Didaan			
26	Q:	Okay Ms. Trevino, we're getting there. First, tell me where you are from.	Dia you			
20	grow up here?					
I			Page 3			

1	A:	Yes. My father owns the bank, First National of Dullas. I attended Dullas High				
2	School and am a junior at A & M University, where I am working on my degree in early					
3	childhood education. I expect to have my teacher's certificate upon graduation next year and then					
4	will be looking for a job here in town. I met Tim last year at Christmas break and we hit it off.					
5	We dated for about six months.					
6 7	Q:	Tim is Tim Parker?				
8	A:	Yes.				
9	Q:	How old are you?				
10	A:	I'm 21.				
11	Q:	Are you married?				
12	A:	No.				
13 14	Q:	Do you have children?				
15	A:	No. But Pippa was like my daughter.				
16	Q:	But she was not your child and you were not married to her father Tim Parker?				
17	A:	Right.				
18	Q:	I notice you are in a wheelchair. Is that the result of the injuries you suffered in the				
19	crash where Tim was killed?					
20	A:	Yes.				
21 22	Q:	Did the doctors tell you what your injuries are?				
23	A:	Yes. They were all in the discharge papers I received when I left the hospital.				
24	Q:	What were your injuries from the crash?				
25	A:	I have hairline fractures of vertebra bones T1 through T5, and T-6 was broken. I				
26	have a broken pelvis and sacrum. I have these cuts on my head and some on other places. And I					
		Page 4				

1	have this horrible road rash on my side around my hip. That will probably leave an ugly scar. I					
2	just got out of the hospital, and I am staying with my grandmother right now because she lives					
3	³ near the hospital.					
4	Q:	Are you taking any pain medicine?				
5	A:	Well, just Tylenol right now. The doctors say I must have a high pain threshold,				
6 7	because I onl	y have a little discomfort now.				
8	Q:	So you are not under the influence of any kind of medication that would affect yo	ur			
9	ability to understand these proceedings or the questions I'm asking you?					
10	A:	No.				
11	Q:	What about any kind of illegal drugs, like marijuana?				
12 13	A:	No.				
14	Q:	How about Ecstasy? They call it Molly.				
15	A:	No.				
16	Q:	I understand that when you were released from the hospital to pretrial supervision	i,			
17	your initial urine sample was positive for marijuana. Is that right?					
18	A:	That's possible. I used to smoke and I think it takes a while to get out of your				
19	system. That	's what they told me at pretrial services anyway.				
20	Q:	And to be clear, when you said "used to smoke," you mean marijuana?				
21 22	A:	Yes.				
23	Q:	When did you stop?				
24	A:	A long time ago.				
25	Q:	So, does that mean a week? A month? A year?				
26	A:	A couple of weeks before.				
		Page 5				

1	Q:	Before what?
2	A:	The wreck. The accident.
3	Q:	The wreck that killed Tim Parker?
4	A:	Yes. The accident.
5 6	Q:	When did that occur?
7	A:	It was on April 30.
8	Q:	Of 2018?
9	A:	Yes.
10	Q:	What time was it?
11	A:	I believe it was about 4:00 in the morning.
12	Q:	On Interstate 10?
13 14	A:	Yes.
15	Q:	Whose car was it?
16	A:	His. Tim's. We both used the car.
17	Q:	Who was driving?
18	A:	He was.
19	Q:	Are you sure about?
20	A:	Yes. I was in shock.
21 22	Q:	Not in shock until after the wreck, though, right?
23	A:	After the accident.
24	Q:	But wasted before, right?
25	A:	No.
26	Q:	Well, the troopers recovered an empty carton of Twisted Tea and an empty can of
		Page 6

O:

Q:

Twisted Tea there in the car. Had you been drinking?

A: Well, I hate to say so, but I had a couple of the Twisted Teas while we were at the State Park..

And you hate to say so because you were actually driving the car?

No, I was not driving then. I hate to say so because if I had been more in control, I A: might have been able to talk Tim out of driving us, maybe to call somebody to come get us. Tim was pretty wasted, but he refused to listen to me.

Let's back up. Where had you and Tim been earlier that night?

A: Well, late in the evening we went to Armadillo State Park to party and have fun. I remember I was driving when we went there. We met some people there we didn't even know, but they were fun and we were too. Then some other people came over to us and told us we were being too loud and obnoxious. They basically kicked us out. We were just trying to have a little fun. I didn't see anyone else around, so I can't imagine who complained about us. The other people who were there were in it with us—we were all just having a good time. People were singing with the karaoke. There were two women there, I remember them because they were not from Lone Star. Eugenia and Pamela. They said they had an all women band. They were not bad, but I don't know if they really had a band or not. Anyway, the point is, if the hadn't kicked us out, none of this would have happened. I suggest that you all find out about that and who those people were and why they kicked us out. In reality, it seems to me that if we are going to assign fault, they should bear their share, those obnoxious people at that park. We weren't hurting anything.

Q:

How much did you have to drink?

A: I already told you. I had a couple of Twisted Teas..

1	Q:	So you were you drinking Twisted Tea?						
2	A:	Yes, and so was Tim.						
3	Q:	Were you drinking other alcohol as well?						
4	A:	Well, those other people at the park had several kinds of drinks. I seem to recall						
5	vodka and pe	ppermint schnapps, among others. I don't think I had any.						
6 7	Q:	So who was in the car when you left the park?						
, 8	A:	Tim was driving and I was in the passenger seat. Pippa was sleeping in the back.						
9	Q:	Who put Pippa in the car?						
10	A:	I don't remember for sure, but it must have been Tim.						
11	Q:	Did you check the security of the child seat?						
12	A:	She wasn't in the child seat. She was asleep in the back. I really don't remember						
13	much about leaving, except that those people were very unpleasant when they kicked us out.							
14	Q:	Why was Pippa with you and Tim at that time of the night?						
15 16	A:	Tim couldn't leave her home alone, and we couldn't get a babysitter. We just						
17	wanted to get out for a little while on a Saturday night.							
18	Q:	And are you sure Tim was driving when you left?						
19	A:	Yes. I wasn't driving, so it had to be Tim. I remember driving us to the park.						
20								
21	Q:	When you left the park, where did you go?						
22	A:							
23	Q:	I want to ask you about some text messages from your phone. You had your phone						
24	with you that	evening, didn't you?						
25	A:	Yes. I take it everywhere.						
26	Q:	I'll show you what's been marked Exhibits 10-A through 10-E. Do you recognize						
	l	Page 8						

1	this screen sh	not of some text messages in your phone?					
2	A:	A: Let me see.					
3	Q:	Q: On your phone, your texts are the orange ones and the people you are texting with					
4	are the gray ones, right?						
5	A:	A: Yes.					
6 7	Q:	So on April 29, at 5:51 p.m., you and someone listed in your contacts as "Mama	a"				
, 8	were texting	back and forth about money you needed for some "bud." Is that your mother?					
9	A:	Yes.					
10	Q:	So you and your mom were texting about marijuana?					
11	A:	Yes.					
12	Q: And she said she didn't know if she had \$40 for you?						
13	A: Yes.						
14	Q:	In Exhibit 10-E, you asked your mom to meet you out of town later, and she said					
15 16		she was going to a movie in this text at 6:07 p.m.?					
17	A: Yes.						
18	Q:	Later that evening, were you texting with someone you know as "Jake S"?					
19	Q. A:	Oh. I guess I was. We met Jake behind the bar.					
20							
21	Q:	What is Jake's last name?					
22		A: I don't really know. It starts with an "S." He is a friend of Tim's.					
23	Q:	Q: In Exhibit 10-C, which is at 1:45 a.m. on April 30, you asked Jake if he got a break,					
24	whether he w	yould join you by the trash cans to "smoke a bowl." Do you see that here?					
25	A:	Yes. That was before we went to the Park.					
26	Q:	Explain that please.					
I	l	Page	9				

1	A:	Well, Jake worked in town as a bouncer at a bar and it was Saturday night, so he							
2	was working	was working late at the bar. And we were asking him if he wanted to come out back by the							
3	dumpster to	hang out with us later.							
4	Q:	Did you smoke marijuana there?							
5	A:	No. "Smoke a bowl" means smoking meth. I don't use it.							
6 7	Q:	Did you get money to buy marijuana that night?							
, 8	A:	No.							
9	Q:	Was there any marijuana in the car?							
10	A:	Not that I knew of. I didn't have the money, and I had quit.							
11	Q:	Had you really quit? Or you just didn't have the money when you sent that text?							
12	A:	No, I had quit. I know it is against the law.							
13	Q:	You didn't do anything to raise the money that night? Like sell a little "Molly?"							
14 15	A. No								
16	Q:	So you and who else were at the dumpster?							
17	A:	Tim, Jake and maybe some other people too. I don't remember who else was there.							
18	Q:	Was anyone smoking meth or marijuana, including you?							
19	A:	I remember just talking and hanging out while Jake was on his break. Those							
20	people had k	icked us out of the park, so we were looking for somewhere else to have a little fun.							
21	Jake is funny	y guy so we wanted to see about hanging out with him.							
22 23	Q:	And in this text message at 1:45 a.m., Jake told you that "dope sounds good," and							
24		te a break in 15 minutes or so, right?							
25	A:	That's what it says.							
26	A:	At 1:48 a.m., in Exhibit 10-C, you sent a text back describing the gold Acura you							
		Page 10							

1	drove to Arm	adillo State Park, right?
2	A:	That's the car we were in. I don't remember these texts.
3	Q:	And on Exhibit 10-A, at 2:36 a.m., Jake replied to your text that it sounded good
4	and he was th	inking about getting a half-ounce of "Molly," too, didn't he?
5 6	A:	Yes. The text you are showing me says it would depend on the price.
7	Q:	Then you replied, "Sounds good," and he replied, "Yup," right?
8	A:	That's what it says.
9	Q:	You sent these texts didn't you?
10	А;	Tim must have used my phone for that too.
11	Q:	Now on Exhibit 10-B, Jake is asking you at 2:29 a.m., how much for Molly, isn't
12	he?	
13 14	A:	I don't remember that text.
15	Q:	You replied it depended on the "bulk," or the amount, isn't that right?
16	A:	I don't remember these messages.
17	Q:	Here it is on Exhibit 10-B. For the record, I am showing you this exhibit too. At
18	2:30 a.m., yo	u said it would depend—for bulk it was 10, and for a single it was 15 a hit, and you
19	also wanted h	im to know it was "bomb stuff," the "Molly." That means is was really strong stuff,
20	right?	
21	A:	I assume that's what it means.
22 23	Q:	Isn't that what it says?
23	A:	Well, yes. I think Tim was sending those messages. He could have gotten my
25		e. I used his sometimes too. That's what it says, but I don't remember any of this. I
26		er meeting Jake before we left for the Park.
	only rememb	er meening vale bereie ne fert for me i ank.

1	Q:	"Molly" is the same as Ecstasy? MDMA?
2	A:	Yes.
3	Q:	Did you use MDMA, or "Molly," that night or the early morning of April 30?
4	A:	I did not take any on purpose, but someone could have put some in one of my
5 6	drinks. We	were around people I didn't know at the park and behind the dumpster. I did not
7	intentionally	take any "Molly" that night. I hate to think that it could have been Tim who did that
8	to me. I tho	ught he was different, special. I thought we had a future together. But I'm seeing
9	these messag	ges on my phone, and I may I have some water?
10	Q:	Of course. Are you alright?
11	A:	Yes. Thank you.
12	Q:	What happened between the time you met Jake behind the dumpsters and the time
13	of the accide	ent?
14 15	A:	We went to the State Park for the night and that's where we met those people who
16	were so fun,	and then some others kicked us out after a couple of hours and we headed back to
17	town.	
18	Q:	Do you remember telling anyone at the scene of the crash who was driving?
19	A:	Well, I drove us to the Park. And I drove to meet Jake too before we went to the
20		what I can remember. Everything around the accident, it's a blur. Like a bad dream,
21		remember the car rolling over and over, then I was walking around in the road, and
22		
23	-	ce came. The blue lights were flashing everywhere and they all had flashlights
24	shining in m	y face and trying to talk to me. I was in shock, you know. It's like it wasn't real. I
25	was bleeding	g and my head was cut. I started to ache everywhere and they took me to the hospital.
26	I think I aske	ed about Tim and Pippa, but nobody would tell me anything. They just kept asking
		Page 12

1	me questions.	I believe I told them that I was not driving, if they asked me, because I wasn't.				
2	Q:	So were you driving at the time of the wreck or not?				
3	A:	I told you it was all a blur. I think Tim was driving.				
4	Q:	So the Trooper who investigated the crash found the driver's seat in the most				
5 6	forward positi	on indicating that Tim could not have fit in the seat and driven. Are you sure you				
0 7	weren't drivin	ıg?				
8	A;	You know that seat had a malfunction. It would slip forward if we hit a pothole.				
9	Tim got a Rec	call Notice from Acura, but hadn't taken the car in for its repair.				
10	Q:	Can you tell us what caused the wreck?				
11	A:	I don't know for sure. What I remember is the car swerved from one side to the				
12	other, and the	n it rolled over and over. I was out of the car before I realized what happened. I was				
13 14	in the road. I'm not sure how I got out. That's when the police came.					
15	Q:	Was anyone in the car wearing a seatbelt?				
16	A:	I don't know. I usually wear a seatbelt but I just don't remember.				
17	Q:	The trooper's report says you didn't ask about Tim or Pippa, and you didn't show				
18	significant co	ncern for their condition. Is that true?				
19	A:	I don't know what he thought significant concern could be. I was in shock.				
20	Q:	Do you remember the troopers asking you for consent to draw your blood for a				
21 22	test?					
23	A:	I remember someone talking to me about that, but I don't remember who that was.				
24	I think I did.	I was hurting all over from the accident. I think they gave me something for my				
25	pain before th	e ambulance took me to the hospital.				
26	Q:	You didn't drink any more alcohol after the wreck did you?				

1	A: No. The medical people were trying to take care of me.						
2	Q: Is there anything else you want to tell us?						
3	A: No, I don't think so. I just wanted you to hear my side of the story. I wanted to tell						
4	you that none of this would have happened if we had just been allowed to stay at the park. It was						
5 6	just a horrible accident. I lost the people I loved in that wreck. I just wanted to tell you all that.						
7	Q: Okay Ms. Trevino. You are excused.						
8	FURTHER THE DEPONENT SAYETH NOT.

REPORT OF DR. C. L. POZZA RE: BREE CANDY TREVINO ANALYSIS OF TOXICOLOGY REPORT

In preparation for this analysis, I have reviewed the discovery provided by the State to the defense attorneys representing Bree Candy Trevino in a criminal prosecution for vehicular homicide while under the influence, a charge brought relating to a single vehicle crash on April 30, 2018 at approximately 4:17 a.m. These materials include the state troopers' reports, photographs, Trevino's grand jury transcript and a toxicology report prepared and authenticated by five toxicologists at the Lone Star Department of Justice, Forensic Science Division. I observed that the troopers report collecting alcoholic beverages from the vehicle at the scene, and that they detected the odor of alcohol on Trevino's person at the hospital. I also observed that there was a report that Trevino had smoked marijuana at approximately 1:00 a.m. the morning before the crash.

I have observed that the initial blood draw taken by hospital personnel for treatment purposes where Trevino was transported immediately after first responders arrived at the scene, approximately one hour after the crash, showed an alcohol concentration of 0.054g/100ml. The second blood draw was taken after the trooper arrived at the hospital and requested a blood sample pursuant to Lone Star's Implied Consent statute. This sample was taken approximately three hours after the crash and submitted to the Lone Star Crime Lab for analysis. It was only after one of the troopers reviewed the hospital records and realized that there was no drug screen conducted on the first blood draw that he requested additional testing on the hospital sample.

The toxicologists at the state forensic science laboratory received this second blood sample and conducted an analysis. This report is identified as Exhibit 12. I have observed that no ethanol was detected in this blood sample. I further observed that among the drug confirmations found in the state's analysis was THC-COOH, which was 33ng/ml.; MDMA, which was .45 mg/l. I have observed the annotation in the state's report that THC-COOH is an inactive metabolite of THC.

I am aware that the state is seeking to prove that Trevino operated the vehicle involved in the crash while under the influence of alcohol and drugs. I am aware that state might seek to offer the state's toxicology report, Exhibit 12, as evidence supporting the proposition that Trevino was under the influence of a controlled substance at the time of the crash. I will first discuss the THC substances.

THC is the substance in marijuana which landed it on Schedule I of the controlled substances act. Both state and federal court have held that the purpose of banning marijuana was to ban the euphoric effects produced by THC, in that the hallucinogenic or euphoric effects produced by this agent led to the ban on possession, importation and distribution of marijuana.

THC is primarily metabolized in the human body to 11-hydroxy-THC, which has equipotent psychoactivity to delta-9-TCH. The 11-hydroxy-THC is then rapidly metabolized to the 11 nor-carboxy-THC, or THC-COOH, which is not psychoactive. This is the body's biological process of converting marijuana into a water-soluble form that can be excreted more easily. THC-COOH is not listed as a schedule I controlled substance. The statute also includes "derivatives" of marijuana, and "synthetic equivalent" of marijuana. THC-COOH is neither.

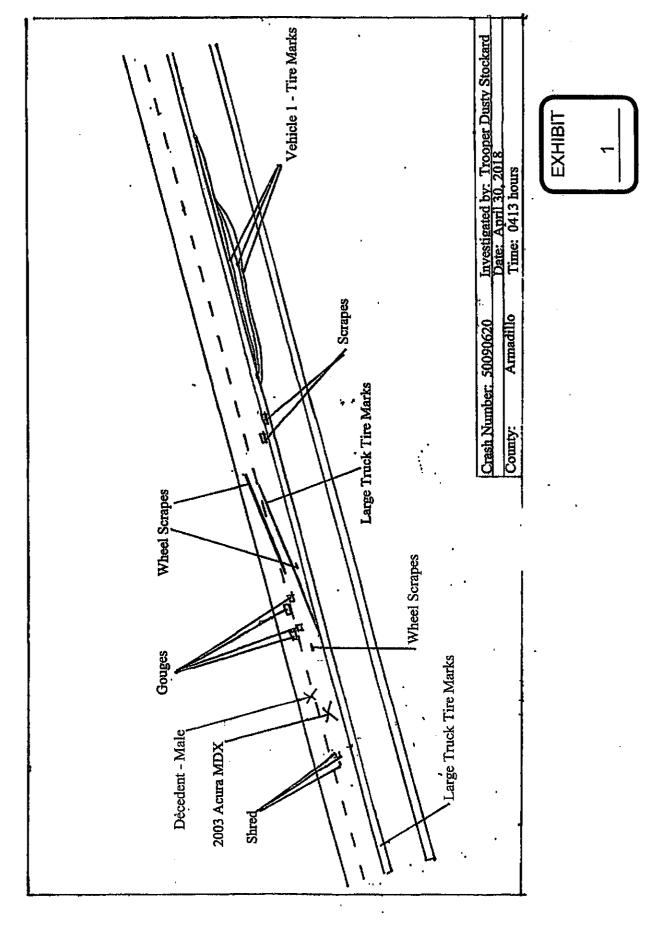

A derivative is not the same thing as a metabolite, and as indicated above, THC-COOH is the second stage metabolite from 11-hydroxy-THC. THC-COOH is not a synthetic equivalent of THC because synthetic substances are substances that were altered, sometimes in minor ways, but that can still have pharmacological effects on a person. This definition does not include THC-COOH, which as stated previously is actually a metabolite– that is, a natural by product that is created when a person's body breaks down THC. Therefore, THC-COOH is not a synthetic substance either.

From my training and experience, I know that this metabolite, THC-COOH could remain in a person's blood for a long period after the THC is gone. It could remain in a person's system for weeks after the marijuana was ingested, as many as 28 to 30 days after ingestion. While the presence of THC-COOH in the blood conclusively proves that a person ingested THC in some point in time, its level in the blood correlates poorly, if at all, to an individual's level of THC-related impairment. In fact THC-COOH could remain in the blood long after all THC has gone, as THC quickly leaves the blood and enters the body's tissues. It is widely accepted in the forensic science community that the levels of THC-COOH does not correlate with the effects of THC. The scientific evidence is irrefutable that THC-COOH stays in a person's system far past the point of any impairment. Chronic users can have mean plasma levels of THC-COOH of 45 ng/ml 12 hours after use, when corresponding THC levels are less than 1ng/ml.

In this case, Trevino's levels of THC-COOH was less than 33ng/ml. In her grand jury testimony, Trevino admitted that she had previously used the substance, but had stopped using it some weeks before the accident. Accordingly, in my professional opinion, this level of THC-COOH is most likely the result of prior use, and certainly cannot be used to attribute marijuana use or intoxication to Trevino at the time of the accident.

The second substance identified in the blood sample was MDMA. MDMA, or 3,4-Methylenedioxymethamphetamine, is a Schedule I controlled substance. It is completely synthetic. It is a hallucinogen which stimulates the central nervous system when ingested. It can make a person feel euphoria, but it is a dangerous drug which causes increased body temperature, brain swelling, and hallucinations. It can render a person incapacitated and without recall ability. Elimination of MDMA from the body is moderately slow, the halflife for MDMA disappearance from the blood being approximately 8 hours. Accordingly, approximately 40 hours must pass for the body to eliminate 95% of the MDMA ingested. Between 50 mg to 150 mg of MDMA is considered a typical dosage range for a unit of MDMA, so it is apparent that the dosage units vary widely. In other words, two dosage units at 50 mg each would not create the same effects at one dosage unit at 150 mg. The relationship of specific blood drug levels to impaired driving has not been established for MDMA as it has for alcohol. Accordingly, even though the presence of MDMA may be established in a blood sample, impairment cannot generally be attributed to that substance. An exception would be where there is a massive amount of the substance present, which would be expected to result in impairment in any activity. That is not present in Trevino's case. In my professional opinion, the level detected in Trevino's blood, .45 mg/I, does not establish that she was impaired by MDMA at the time of the accident.

Materials I have reviewed which have informed my opinion in this report, in addition to those listed above, include the National Highway Traffic Safety Administration publication, "Drugs and Human Performance Fact Sheets" published in April 2004, the NIDA Research Monograph 7, Cannabinoid Assays in Humans, by Robert E. Willette, Ph. D., the National Highway Traffic Safety Administration's Marijuana Impaired Driving Report to the United States Congress, PMC US National Library of Medicine National Institutes of health, CMAJ-JAMC 2001 Oct 2; 165(7);917-928, Journal of Analytical Toxicology, Vol. 21, November/December 1997 Letter to Editor by M.R. Moeller and M. Hartung, Institute of Legal Medicine, Homburg/Saar, Germany, and Independent Drug Monitoring Unit.

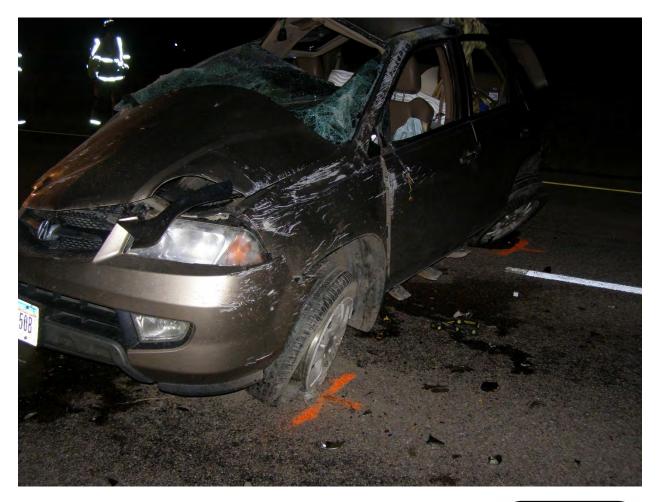

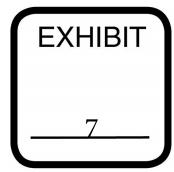

Acura MDX Recall

TO ALL OWNERS OF ACURA MDX VEHICLES:

There is currently a recall for your vehicle. Act soon!

NHTSA Vehicle Safety Recalls

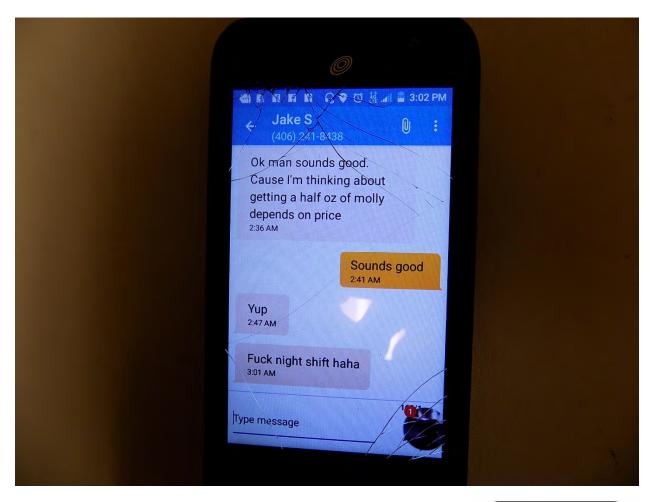

- Recall Number
 - 15V370000

Recall Date

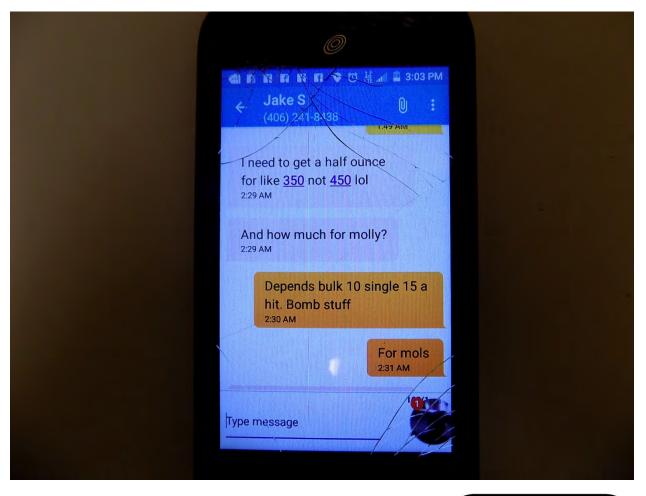

06/15/2017

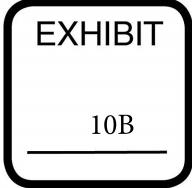

The Honda Motor Company has determined that the bolts that secure the front seats in the MDX can corrode and thus fail to function and keep the seat in the position desired by the driver. The malfunction seems to occur most often if the vehicle suffers a severe jolt such as might occur if hitting a large pot hole or in an automobile crash. This flaw will be repaired at no cost to you if you bring your vehicle to a certified Honda dealer. Simply call the dealer and give them your vehicle identification number (VIN) and make an appointment for the replacement of these bolts.

CASE SUPPLEMENT REPORT

CASE# 2018-00016465

NARRATIVE

On 04/30/2018, I, Deputy J. White responded to mile marker 116 west bound I-10 for a report of a rollover crash. Deputy T. Wafstet arrived on scene shortly before I did. Deputy Wafstet informed other units via radio that their was two code blacks one of them a small child and the other an adult male.

Upon arrival I saw Deputy Wafstet with a female who appeared to be injured but was standing and talking. I made contact with the female later identified as Bree Trevino. Bree kept saying she wanted to check on Tim and his daughter. I knew the other two occupants of the vehicle were both code black so I tried to keep Bree away from them. I asked Bree if she wanted to sit down until medical could check on her. Ashley asked if she could sit in my patrol vehicle until medical arrived. I escorted Bree to my patrol vehicle and she sat in the back seat for approximately two minutes before medical arrived. After reviewing my WatchGuard video approximately 18 minutes 12 seconds into the video you can hear medical personnel ask Bree where she was in the vehicle when the crash occurred. Bree responds "I was driving in the driver seat."

I burned a copy of my WatchGuard video to a disc and placed the disc in evidence locker PL3 at the Sheriff's Office. I also sent a copy of the video to the robot for evidence.

Nothing further to report. 443

SEROLOGY/DNA REPORT

EVIDENCE:

Non-bold items were either not examined at this time or did not require serological analysis.					
<u>ltem</u>					
001.01	Root portions of two apparent hairs from (001)				
002.01	Root portions of two apparent hairs from (002)				
003.01	Root portions of two apparent hairs from (003) (Pippa Parker reference standard)				
004	TWO (2) BUCCAL SWABS - BREE TREVINO REFERENCE STANDARD				

RESULTS AND CONCLUSIONS:

ltem

004

TWO (2) BUCCAL SWABS - BREE TREVINO REFERENCE STANDARD

The buccal swab sample (004.01) was retained as a reference standard for Bree Trevino.

DNA

DNA was extracted from the items forwarded for DNA analysis using organic and/or bead extraction techniques. Samples that were amplified were done so using the Qiagen Investigator 24 plex amplification kit which amplifies DNA from the following genetic markers: Amelogenin, TH01, D3S1358, vWA, D21S11, TPOX, DYS391, D1S1656, D12S391, SE33, D10S1248, D22S1045, D19S433, D8S1179, D2S1338, D2S441, D18S51, FGA, D16S539, CSF1PO, D13S317, D5S818 and D7S820. The amplified products were electrophoresed and analyzed on an ABI 3500 Genetic Analyzer.

CONCLUSIONS

Based on a comparison of the DNA profiles from the items forwarded for DNA analysis, the following conclusions were drawn:

001.01 Root portions of two apparent hairs from (001)

The DNA profile obtained from this item matches that of Bree Trevino (004.01). Based on national statistics*, the estimated probability of an unrelated individual from a random population having a DNA profile matching the DNA profile obtained for this item is:

> 1 in 2.47 octillion Caucasians 1 in 2.63 nonillion African-Americans 1 in 65.2 octillion Hispanics

Pippa Parker (003.01) can be excluded as a possible contributor of this DNA profile.

002.01 Root portions of two apparent hairs from (002)

The partial DNA profile obtained from this item is consistent with the DNA profile of Pippa Parker (003.01). Due to no data, inconclusive data, or data below the laboratory's statistical reporting threshold at the D21S 11, SE33, D2S1338, and FGA loci, these loci will not be used for statistical calculations for this result. Based on national statistics*, the estimated probability of an unrelated individual from a random population having a DNA profile matching the partial DNA profile obtained for this item is:

EXHIBIT 14

1 in 3.96 sextillion Caucasians

Continuation of Report for Lab # FSD-18-006946

1 in 1.96 septillion African-Americans 1 in 13.6 sextillion Hispanics

*Hill, C.R., Duewer, D.L., Kline, M.C., Coble, M.D., Butler, J.M. (2013) U.S. population data for 29 autosomal STR loci.Forensic Sci. Int. Genet. 7: e82-e83.

Bree Trevino (004.01) can be excluded as a possible contributor of this DNA profile.

004.01 Bree Trevino reference standard

The DNA profile obtained from this item (004.01) will be entered into and searched against the Lone Star DNA Identification Index. This profile is not eligible for entry into the National DNA Index System (NDIS) at this time.

DISPOSITION OF EVIDENCE

The following items were consumed in analysis with permission:

- 001.01 Root portions of two apparent hairs from (001)
- 002.01 Root portions of two apparent hairs from (002)
- Root portions of two apparent hairs from (003) (Paityn Zuleger reference standard) 003.01

The following items will be retained in the laboratory:

004.01 Bree Trevino reference standard

Remaining extracts generated in the course of analysis.

Date: August 10, 2018

RICKY SHELTON FORENSIC DNA ANALYST

LONE STAR DEPARTMENT OF JUSTICE Non-CMV IMPLIED CONSENT ADVISORY (Operation of non-commercial motor vehicles only)

A. You are under arrest for: (check appropriate offense)

- Driving (or being in actual physical control of) a motor vehicle while under the influence of alcohol (and/or drugs).
- Being under twenty-one (21) years of age and driving (or being in actual physical control of) a motor vehicle with an alcohol concentration of .02 or more.

- OR -

B. I have probable cause to believe that you were driving or in actual physical control of a vehicle, and : (check appropriate circumstance)

- Were under the influence of alcohol (and/or drugs) in violation of 61-8-401 and the vehicle you were driving was involved in a motor vehicle accident resulting in property damage.
- Were involved in a motor vehicle accident resulting in serious bodily injury or death.

Under Lone Star law, a person in your situation is deemed to have given his or her implied consent to testing for alcohol and possibly testing for drugs.

As the requesting officer, I have the right to select the type of test or tests you will be asked to take. I am going to ask you to take a breath (or blood) test. (Later I may ask you to take a blood test.)

- (1) You must decide to take or refuse this test without talking to an attorney. Your right to an attorney under Miranda does not apply.
- (2) IF DRIVER HOLDS A BASE DRIVER'S LICENSE (ONLY NON-COMMERCIAL MOTOR VEHICLE DRIVING PRIVILEGES):

If you refuse this test, your driver's license will be seized and suspended for six (6) months.

If you have refused similar testing within the past five years and you refuse again today, your driver's license will be seized and your privilege to drive will be suspended for one year.

(3) IF DRIVER HOLDS A COMMERCIAL DRIVER'S LICENSE: In addition to any actions taken against your non-commercial driving privileges, as the holder of a commercial driver's license:

If you refuse this test, your commercial driver's license will be seized and suspended for one (1) year.

If you have refused similar testing in the past or have a prior major offense on your driving record and you refuse testing today, your commercial driver's license will be seized and suspended for life.

- (4) If you have a driver's license issued by another jurisdiction and you refuse to take this test, your non-resident driving privileges in Lone Star will be suspended for a minimum of six months to a maximum of life, depending on the class of license that you are holding (non-commercial or commercial driver's license) and your current driving record, plus your license will be seized and returned to the licensing agency of your home jurisdiction along with a report of your testing refusal.
- (5) You will not be eligible for a probationary driver's license during the suspension.
- (6) If you refuse testing, you may contest the action taken against your license by filing a petition in a Lone Star District Court. The action will not be overturned unless you prove that your arrest or the investigatory stop was unlawful or that you did not refuse testing. You may ask the court to restore your driving privileges until the court rules on your petition.
- (7) Your test results or testing refusal may be used as evidence against you in a criminal trial. Additionally, if you refuse testing today, the jury (or judge in a non-jury trial) may infer from your refusal that you were under the influence of alcohol and/or drugs. The inference is rebuttable.
- (8) After the requested testing is completed or refused, you may have a doctor or nurse administer an independent test for alcohol or drugs at your expense. If you refuse testing now, taking an independent test will not change the action taken on your driver's license.

A breath test requires you to blow a proper sample of air into this instrument. It will analyze your breath sample for alcohol concentration. Will you take a breath test?

Bloop	Yes <u>No</u> No

1 2 3	IN THE FOURTH JUDICIAL DISTRICT COURT FOR THE COUNTY OF ARMADILLO STATE OF LONESTAR			
4	STATE OF LONESTAR,	CRIM. NO. 18-DC-70		
5	v.			
6 7	BREE CANDY TREVINO.			
8				
9	FINAL JURY I	INSTRUCTIONS		
10				
11	Members of the Jury. I thank you for your attention during this trial. Please pay attention to the instructions I am about to give you.			
12 13	In this case, Bree Candy Trevino is charged with Two Counts of Negligent Homicide While Under the Influence. You must reach a separate verdict on each			
14	count.	-		
15	To prove the crimes of Negligent Homicide While Under the Influence, the Government must prove beyond a reasonable doubt that Bree Candy Trevino negligently caused the death of TP and PP while she was under the influence of alcohol or drugs.			
16 17				
18				
19	There are certain elements of the crime that the Government must prove beyond a reasonable doubt. Those elements are: 1) that the Defendant caused the			
20	death of TP and PP; 2) that at the time the Defendant caused the death of TP and PP, the Defendant was operating a motor vehicle while under the influence of			
21	alcohol or drugs; and 3) that the Defenda			
22	Under the laws of Lone Star, a per	son acts negligently with respect to a result		
23	or to a circumstance described by a statute defining an offense when the person			
24 25	consciously disregards a risk that the result will occur or that the circumstances exist or when the person disregards a risk of which the person should be aware that			
25 26	the result will occur or that the circumstances exists. The risk must be that of a nature and degree that to disregard it involves a gross deviation from the standard			

1 2	of conduct that a reasonable person would observe in the actor's situation. "Gross deviation" requires a deviation that is considerably greater than lack of ordinary		
	care.		
3 4	"Under the Influence" means that as a result of taking into the body alcohol, drugs, or any combination of alcohol and drugs a person's ability to safely operate a		
5	motor vehicle has been diminished.		
6 7	In deciding whether or not the Defendant was under the influence of alcohol, there are certain inferences that you may follow:		
8			
9	The concentration of alcohol in the Defendant, as shown by analysis of a sample of his/her blood or breath drawn or taken within a reasonable time after the		
10	alleged act of driving under the influence of alcohol gives rise to the following inferences:		
11			
12	(a) If there was at that time an alcohol concentration of 0.04 or less, it may be inferred that the Defendant was not under the influence of alcohol.		
13	(b) If there was at that time an alcohol concentration in excess of 0.04 but		
14	less than 0.08 that fact may not give rise to any inference that the Defendant was or was not under the influence of alcohol, but the fact		
15	may be considered with other competent evidence in determining the		
16	guilt or innocence of the Defendant.(c) If there was at that time an alcohol concentration of 0.08 or more, you		
17	are permitted, but not required to infer that the Defendant was under		
18	the influence of alcohol. It is your exclusive province to determine whether the facts and circumstances shown by the evidence warrant the		
19	inference to be drawn by you.		
20	You must weigh the evidence presented and decide whether the State has		
21	proven beyond a reasonable doubt that the Defendant was under the influence of		
22	alcohol.		
23	It is up to you to decide what evidence is reliable. You should use your		
24	common sense in deciding which is the best evidence and which evidence should not be relied upon in considering your verdict. You may find some of the evidence		
25	not reliable or less reliable than other evidence. In doing so, you should consider how the witness acted as well as what he or she said. Some things you should consider are:		
26			

1	
2	1. Did the witness seem to have an opportunity to see and know the things about which the witness testified?
3 4	2. Did the witness seem to have an accurate memory?
5 6	3. Was the witness honest and straightforward in answering the attorneys' questions?
7 8	4. Did the witness have an interest in how the case should be decided?
9	5. Does the witness's testimony agree with the other testimony and the other evidence in this case?
10	
11	6. Did the witness at some other time make a statement that is inconsistent with the testimony he or she gave the court?
12	
13	7. Was it proved that the witness had been convicted of a crime?
14 15	8. Was it proved that the general reputation of the witness for telling the truth and being honest was bad?
16	truth and being honest was bad.
17	9. Some witnesses who testify claim to have special knowledge, skill, training, experience or education that enable them to offer opinions or
18	inferences concerning issues in dispute. The fact that a witness has knowledge, skill, training, experience or education does not require you to
19	believe the witness, to give such a witness's testimony any more weight
20	than that of any other witness, or to give it any weight at all. It is
21	important for you to keep in mind that the witness is not the trier of fact. You are the trier of fact. It is for you to decide whether the testimony of a
22	witness, including any opinions or inferences of the witness, assists you in
23	finding the facts and deciding the issues that are in dispute. And, it is for you to decide what weight to give the testimony of a witness, including
24	any opinions or inferences of the witness.
25	You may rely upon your own conclusions about the witnesses. A juror may
26	believe or disbelieve all or any part of the evidence or the testimony of any witness.

1	
2	The defendant in this case has become a witness. A juror may believe or disbelieve all or any part of the evidence or the testimony of any witness.
3 4	There are some general rules that apply to your deliberations. You must follow these rules in order to return a lawful verdict:
5 6	1. You must follow the law as it is set out in these instructions. If you fail to follow the law, your verdict will be a miscarriage of justice. There
7 8	is no reason for failing to follow the law in this case. All of us are depending on you to make a wise and legal decision in this matter.
9	2. This case must be decided only upon the evidence that you have heard
10	from, the answers of the witnesses and the exhibits and these instructions.
11	3. The case must not be decided for or against anyone because you feel
12	sorry for anyone or are angry at anyone.
13	4. Remember the lawyers are not on trial. Your feeling about them
14	should not influence your decision in this case.
15	5. Your duty is to determine whether the Defendant is guilty of the crimes
16	charged beyond a reasonable doubt. It is the judge's job to determine the
17	proper sentence if the defendant is found guilty.
18	6. The Defendant is presumed to be innocent of the charges filed against
19	him. This presumption remains with him throughout every stage of the trial and during your deliberations on the verdict. It is not every
20	trial and during your deliberations on the verdict. It is not overcome unless from all the evidence in the case, you are convinced beyond a
21	reasonable doubt that the Defendant is guilty. The Defendant is not
22	required to prove her innocence or present any evidence.
23	7. Whatever verdict you render must be unanimous, that is each juror
24	must agree to the same verdict.
25	8. It is entirely proper for a lawyer to talk to a witness about what
26	testimony the witness would give if called to the courtroom. The witness should not be discredited for talking to a lawyer about his or her

testimony.

9. Your verdict should not be influenced by feelings or prejudice, bias, or sympathy. Your verdict must be based on the evidence and on the law contained in these instructions.

Deciding a proper verdict is exclusively your job. I cannot participate in that decision in any way. Please disregard anything I may have said or done that made you think I preferred one verdict over another.

Only one verdict on each charge may be returned as to the crimes charged. The verdict must be unanimous, that is, all of you must agree to the same verdict. The verdict must be in writing and, for your convenience, the necessary forms of verdict have been prepared for you. They are as follows:

[READ VERDICT FORMS]

In just a few moments you will be taken to the jury room by the bailiff. The first thing you should do is elect a foreperson who will preside over your deliberations like a chairperson of a meeting. It is the foreperson's job to sign and ate the verdict back to the courtroom when you return. Either a man or woman may be the foreperson of the jury. When you have reached your verdicts, notify the bailiff and you will be returned to the Courtroom to announce your verdicts.
